REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art of record, individually or in combination, fails to teach the features of claim limitations thereof. Specially, inter alia, the prior art of record fails to teach a network system for isolating virtual private network (VPN) and best effort traffic to resist denial of service attacks, wherein a first ingress boundary router transmits only packets originating from sources within the VPN and targeting the destination host to a first egress boundary router via said VPN, and wherein a second ingress boundary router transmits packets originating from sources outside the VPN and targeting the destination host to a second egress boundary router via a best effort public network; wherein at least said first egress boundary router is configured to transmit packets received via said VPN and targeting said destination host onto an egress access network utilizing a separate logical connection than that employed for packets communicated over the best effort public network, such that the access link is protected from denial of service attacks originating from sources outside the VPN.

2. Claims 2-14 further limit the allowed claim, therefore they are also allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
